Acknowledgement

The project team was led by Hong Jin, Scott Crerar, Steve Crossley, Craig Jamieson and Kate Slater of Food Standards Australia New Zealand involved a core team of Ian Reichstein and Chris Williams of Australian Department of Agriculture and Water Resources, and independent consultant Kevin Bodnaruk. Valuable contributions were received from Nathalie Dore (Agriculture and Agri-Food Canada); Eduardo Aylwin (Chilean Ministry of Agriculture, Chile); Xiongwu Qiao (Shanxi Academy of Agricultural Sciences, People's Republic of China), Fugen Li and Guibiao Ye (Ministry of Agriculture and Rural Affairs, People's Republic of China); Mindy Lam Ching (Centre for Food Safety, Food and Environmental Hygiene Department, Hong Kong, China); Anna Gore and Julie Chao (US Department of Agriculture), William Corwell (US Food and Drug Administration), David Miller (US Environment Protection Authority); Warren Hughes (New Zealand Ministry for Primary Industries); Mohammad Nazrul Fahmi Abdul Rahim (Malaysian Ministry of Agriculture and Agro Base Industry), Daphney Onaga (Papua New Guinea Ministry of Agriculture); Bella Fe D. Carmona and Jacqueline Magdalena M. Romualdez (Fertilizer and Pesticide Authority, the Philippines); Yuan Sheng Wu (Agri-Food and Veterinary Authority of Singapore); and Michael Kaethner, Craig Dunlop and Carmen Tiu (CropLife International).

The team thanks the General Administration of Customs of the People's Republic of China for co-hosting the first expert workshop under this project in Haikou, China.

The team thanks Mr Alex Wu for the design of digital version of this tool which helps to improve the accessibility and user experience of this tool.

The team thanks Mrs Treza Jensen and Mr Mathew Collareda (Food Standards Australia New Zealand) and Huina Li (Chinese Academy of Inspection and Quarantine) for the administrative support they provided.

The work was made possible by funding from the Australian Department of Agriculture and Water Resources and Australian Department of Foreign Affairs and Trade.

1. Applicant details

Requestor's name

Company/organisation name

Address (postal)

Telephone number

Email address

2. Pesticide details

Chemical common name (ISO)

Chemical name and number (CAS)

Chemical name (IUPAC)

Activity (type)

Activity (mode of action or chemical Group code)

3. Particulars of the food commodity to be imported

Name of the commodity/crop group in the importing economy

Name of the commodity/crop group in the exporting economy, if different

Indicate Codex commodity name and classification number, if available

Indicate if nominated commodity/crop group is a new or existing traded item in the importing economy

If new commodity, indicate year of first entry.

Commodity or commodities intended to be imported under this application

List all commodities to be imported under the requested import MRL, i.e., if import MRL sought for a crop group

4. Residue definition(s)

(if different to that applied in the importing economy)

For enforcement (compliance with MRLs)

Indicate the origin/source of the definition with links to published information.

For dietary exposure assessment, if different from above

Listing those metabolites included for dietary exposure assessment, and indicate the origin/source of the definition with links to published information.

Analytical methods for MRL enforcement

Reference

Analytical methods for dietary exposure (if different)

Reference

Nominate the analytical limits of detection (LOD) and quantification (LOQ) values for the analytical methods

Reference

5. Health based guidance values

(if different to that applied in the importing economy)

Acceptable Daily Intake (ADI)

Reference:
If not from JMPR indicate the origin/source of the definition with links to published information.

Acute Reference Dose (ARfD) - if necessary

Reference:
If not from JMPR indicate the origin/source of the definition with links to published information.

ARfD (if established separately for metabolites in residue definition listed previously)

Reference
If not from JMPR indicate the origin/source of the definition with links to published information.

ARfD (If established for other population groups)

Reference
If not from JMPR indicate the origin/source of the definition with links to published information.

6. Requested MRL details and source

Codex MRL, if established

For Codex MRL indicate year of adoption

Indicate the requested MRL value

Indicate the requested MRL value

Reference:

Origin of the requested MRL if different to Codex MRL

Indicate the origin/source of the requested MRL with links to published value.

Approved use pattern of the exporting economy for the pesticide x food commodity to be imported

Provide information on the approved use pattern, i.e., Good Agriculture Practice (GAP).

Economies in which the pesticide has been approved

Indicate other economies in which the pesticide x commodity use is approved.

7.Dietary exposure assessment and origin

If domestic consumption data are unavailable the JMPR IEDI and IESTI assessments can be used.

Outcome of long-term (chronic) dietary exposure assessment and origin, e.g. JMPR

JMPR - Joint FAO/WHO Meeting on Pesticide Residues

Reference
Indicate year assessment completed

Outcome of short-term (acute) dietary exposure assessment and origin, e.g. JMPR.

Reference:
Indicate year assessment completed

8. Additional Information (that may be required to support an import MRL request)

Pesticide x commodity information
(to be provided when an importing economy undertake domestic dietary exposure assessments)

If domestic consumption data or JMPR assessments are unavailable, an **IEDI** and **IESTI** assessments can be undertaken as substitutes.

IEDI 

|

IESTI 

Supervised Trial Median Residue (mg/kg)
(STMR)

IF STMR not available use requested import MRL as default value

Reference

Relevant processing factors when an import MRL request refers to a processed food commodity (STMR-P/HR-P)

Highest Residue (HR) (mg/kg)
IF HR not available use requested import MRL as default value

Reference

A Residue trial data (Summaries)

Reference

B Residue trials data (Full studies)
Summaries, and if full studies required, provide separately

Reference

Requested Commodity Information

Volumes of commodity proposed to be imported
